

Fish House

Dimensions: 3ft (L) x 3ft (W) x 3ft (H)

Weight: 1,500 lbs

Surface Area: 75ft²

KEY BENEFITS

A Natrx Fish House solution provides a range of practical benefits through planning, installation, and ongoing performance.

- Large surface area (75ft²) for less weight/material need
- Organic shape, and void spaces promote marine growth and provide ideal fish habitat
- Safer, faster, more cost-efficient installation compared with traditional solutions

APPLICATIONS

Fish House structures are most applicable for:

- Living shorelines, fisheries, artificial reefs
- Medium wave energy and larger tidal fluctuation environments
- Great habitat for fish or small organisms
- Ecological feature on breakwaters, jetties, seawalls

INSTALLATION

Fish House structures can be installed with minimal heavy equipment. Structures will need to be transported to the project site and placed in the water with a small crane or long reach excavator.

The equipment necessary for installing a Fish House structure will be lighter than the equipment needed to install a comparable rock solution.

“Natrix is a very good solution, especially in high wave energy areas. They’ve proven it again and again. It’s just incredible. This new product from Natrix outperforms rock in big storms.”

Wayne Savage
Senior Engineer
Bay Design Group

HOW TO PURCHASE

We pride ourselves on our ability to deliver high-quality solutions on-time and with transparent pricing. We can design a solution and develop a quote for your project with you directly or through your contractor.

PRICING

ExoForm solutions are engineered to achieve project goals while delivering an additional range of functional and ecological co-benefits at a cost that’s comparable to traditional approaches. With ExoForms we can design the most cost-effective solution for addressing your challenges.

PROJECT INPUT:

Provide us with a general sense of the parameters of your project, your challenges, and your goals and we’ll design and deliver the ExoForm solution that’s best for your site.

Implementing an ExoForm Solution:

Natrix ExoForms solutions are designed for safe, fast, and efficient installation saving your project valuable time and cost. The process for using Natrix ExoForms is straightforward:

- 1 Get in touch with us to discuss the specifics of your project so we can determine the optimal ExoForm™ solution
- 2 Working from your input, we’ll design the ExoForms for your project
- 3 Upon approval and initial payment, your order will enter our production queue and a delivery date and logistics is organized
- 4 Your ExoForms are delivered to your project site for quick and easy installation. That’s it.
